## WHY ADP?

Advanced Distributor Products (ADP) started with a vision to produce the best evaporator coils in the country. In 1992, ADP began production in Grenada, Mississippi, and started developing innovative products that are fully supported by a research and development laboratory, which includes areas for testing, assembling, and designing future products.

Today, ADP offers a wide range of premier HVAC products with exclusive design advantages. We pride ourselves on our quality, flexibility, and solutions. We design our products to fit any application and simplify installation. And we're always open to new partnerships with businesses and the communities we serve.

### QUALITY

- We're proud of our products
- It's all we do
- #1 U.S. producer of residential evaporator coils
- Innovation labs and extensive testing
- Exclusive Microban® technology prevents the growth of mildew

### FLEXIBILITY

- Products designed to match perfectly with any system
- Flexible business partnerships
- Product variations that allow for quick installation and easy access

### SOLUTIONS

- We solve problems!
- Choice of products 10,000 SKUs
- Advanced technical capabilities
- Short lead times are typical
- Experts in our industry

## THE ADP ADVANTAGE

Offering several options for flexibility, ADP air handlers are thoroughly tested to ensure quality and deliver reliable ratings. Our air handler line accommodates any application need.

### ALL ADP AIR HANDLERS OFFER:

Compact and efficient design

Options for heating requirements

Multiple configurations

Available 10-Year extended warranty with registration

Electric or hot water heat options

Easy access control panel and one-point electrical connections

Multiple configurations for installation flexibility

ECM or PSC motor options for enhanced performance

## AIR HANDLER APPLICATION

If you own a heat pump for your home, the indoor component responsible for ceaselessly endeavoring to maintain cozy indoor temperatures is likely your air handler. Typically, air handlers are situated in the attic, basement, or a dedicated closet and may resemble the shape of a gas furnace.

When properly matched with the heat pump's capacity and SEER (Seasonal Energy Efficiency Ratio), the air handler efficiently circulates conditioned air through the home's ductwork. The circulated air can be either cool or hot, depending on the season. It's important to note that according to the Air Conditioning, Heating and Refrigeration Institute (AHRI), using mismatched systems can result in efficiency losses of at least 30% compared to matched systems. Homeowners should consider this efficiency loss when contemplating replacing only the outdoor unit of their split system.

## AIR HANDLER PRODUCT OFFERING

### Low Profile F Series

Factory installed heat, standard or 5-speed high-efficiency ECM motors

120 V & 240 V

### Multi-Position & Hydronic B Series

Multi-position, hydronic for northern climates where heat can be supplied by electric or hot water

120 V & 240 V

### Modular Blower MX Series

Designed for space constrained installations, may also be used as a stand-alone blower

120 V & 240 V

### Gas Furnace Replacement Modular Blower Moduleflex eFurnace™

True replacement for an existing gas furnace as a no-heat unit

120 V

### Compact Wall Mount S Series

Compact wall mount to meet the needs of multi-family market for wall or closet installations

### Soffit Mount CP Series

Ceiling mount designed for a seamless install in multi-family applications

## Improved Air Quality

Microbes can double every 20 minutes on an untreated surface!

Standard plastic pan with visible mold

Plastic pan with Microban® antimicrobial additive

Mold is part of our environment and there are no practical ways to completely eliminate mold spores.

The best defense against mold in a home is to prevent it from taking hold through moisture control and the use of mold resistant building materials.

## Compact Design

F Series air handlers are lightweight and up to 12" shorter than the comparable OEM models.

Compact, lightweight design, up to 12" shorter than the comparable OEM models

Multi-position configurations including upflow, downflow, and horizontal left or right

Available with PSC or 5-speed high-efficiency ECM motor

Electric or no heat, with optional 5-20 kW heat kit factory or field installed

Available in 208/240 V and 120 V

## 120 V 5-Speed ECM Air Handler

The 120 V option is designed to target mild climate applications where electric heat isn't a requirement. The supply voltage is a key feature to help installers save time and money in applications where a traditional AC system is being replaced with a heat pump

## Multi-Function Controls

Easy to read plug and play multi-function control board, standard on all models.

### Control Board Features:

- Controls both factory and field installed circulating pumps
- 24 VAC isolation valve control
- Auxiliary contacts for water heater or boiler activation
- Freeze protection activates at 40 °F
- Thermostat connections
- 60 second time delay for blower activation
- 130 °F aquastat time delay for blower activation (optional)
- Pump timer to meet local or national codes for water circulation

## Variable Speed Option

Optional variable speed high-efficiency ECM motor for enhanced product performance.

### Variable Speed Features & Benefits:

- Maintains selected CFM over wide range of static conditions
- Standard fan time delay feature
- Constant air circulation setting for improved IAQ
- LED display for visual indication of air volume

Multi-position, hydronic for northern climates where heat can be supplied by electric or hot water
Plug and play multi-function control board
Side return option available on 12-36 BTU/H models
Optional variable speed high-efficiency ECM motor for enhanced product performance
Optional easy-to-replace hot water kits, available factory or field installed
Field configurable for upflow and horizontal left and right
Field installed electric heat kits available for 208/240 V models

## Electric Heat Unit

Modular Blowers can be used as a stand-alone electric furnace or combined with an ADP coil.

### Electric Heat Unit Features:

- High-efficiency 5-speed ECM motor
- 5kW - 20kW field installed Electric Heat Kits
- Slide-out panel with one-point electrical connections
- Add an ADP coil to make complete air handler unit

## Hot Water Heat Unit

Easy to read plug and play multi-function control boards provide fast access to key features.

### Control Board Features:

- Controls both factory and field installed circulating pumps
- 24 VAC isolation valve control
- Auxiliary contacts for water heater or boiler activation
- Freeze protection activates at 40 °F
- Thermostat connections
- 60 second time delay for blower activation
- 130 °F aquastat time delay for blower activation (optional)
- Pump timer to meet local or national codes for water circulation

- Modular blower offering flexible options and ideal for a variety of applications
- 208/240 V 5-speed high-efficiency ECM motor with field-installed electric heat kits
- 120 V PSC or 5-speed high-efficiency ECM motor with hot water heat factory installed
- Combine with an existing ADP coil in inventory to reduce SKUs
- Upflow, downflow, and horizontal left or right configurations

eFURNACE

## Moduleflex eFurnace is a true replacement for an existing gas furnace.

With either side or bottom return capability, this modular blower should be a drop-in replacement with no modification needed to the current system. It has a high-efficiency 5-speed ECM motor with no electric heat which allows for installation with an existing electrical circuit in climate applications where electric heat isn't a requirement.

### Features:

- Fits within the existing unit's footprint
- No modification needed to the current system
- High-efficiency 5-speed ECM motor
- No electric heat allows installation with existing electrical circuit

True replacement for an existing gas furnace with a heat pump

Upflow, downflow, and horizontal left or right airflow

No electric heat, only for mild climates

30" tall - shorter than most gas furnaces with industry standard A, B, C, and D cabinet widths

Side return capable on both sides

120 V, 5-speed ECM motor

Combine with an existing ADP coil in inventory to reduce SKUs

See Spec Guide for additional nomenclature details.

## Perfect Fit

ADP provides options for a variety of applications to meet industry needs.

- Fits industry standard footprint
- Shallow depth for easy installation
- Standard connection locations
- PSC and ECM motor options

## Cased Options

The soffit mount knock-down case provides for ease of installation and simple servicing.

- Optional factory installed case for new construction
- Knock-down case accessory saves storage space
- Both cased options return air capable

Designed for a seamless and easy install in multi-family applications

1.5, 2, and 2.5-ton options to meet replacement market needs

PSC and ECM motor options

208/240 V with factory-installed heat available in 3, 5, 6, 8, and 10 kW

Match-ups with all OEM brands

Fits industry standard footprint

Optional factory-installed case for new construction

Compact wall mount to meet the needs of multi-family market for wall or closet installations

Compact, lightweight design, at 30" tall and weighing 80 lbs. or less

Available in copper or aluminum

PSC or optional 5-speed high-efficiency motor: 240/208 V, 60 Hz

Factory installed electric heat available

Top refrigerant connections for easy brazing

## Low Height

ADP provides options for a variety of applications to meet industry needs.

- 30" tall for heat pump match-ups (35" option also available)

## Light Weight

The compact wall mount air handler allows for ease of installation and simple servicing.

- Aluminum and copper wall mount air handler
- Weighing 80 lbs. or less
- Can be a "one-man-job"
